a taste of  
**Blue Jelly**

JP Kenny is one of the world's largest independent and most innovative pipeline, subsea engineering and project management companies. The company has engineered, managed or appraised close to half of all subsea developments across three of the major offshore arenas in the world.

Growth of the organisation in the UK coupled with a lease break led to a move of 350 staff to 68,000sqft within Compass Point in Staines. The project created a Ground floor complex of meeting rooms, fully catered restaurant, separate coffee bar and reception 'Meet pods'. In addition to this 3 further floors of modern work space were provided.

Blue Jelly were one of 3 companies to tender for the works package comprising refurbishment, new construction and relocation elements.

Working within a construction team comprising Client representative, Project Manager, Surveyor and Architect this many faceted project was completed within the keen timeline of 12 weeks.
