WHAT'S THE STORY...

Newton are a rather unique Business Consultancy with the singular vision to 'Demand Better' in all fields

With a model that ensures their fee's are awarded only if tangible business improvement is achieved, Newton employ only the sharpest strategic business minds throughout Europe

Having created Newton's first Workplace in the rural Oxfordshire Countryside a few years prior, Blue Jelly were re-engaged to review their space strategy following the acquisition of further suites set across 2 adjacent buildings.

Due to the nomadic nature of their Consultancy work we moved them toward a more fluid solution providing agile 'drop in' locations which can scale to support a varied team occupancy level over the course of any given month.

The result reinvigorated the existing accommodation whilst providing a busy Business lounge which caters to a variety of modern workflow styles.

Further enhancements to support facilities such as a toilet refurbishment, staff gym and added showers have set the Business up well toward their next stage of development in coming years.
